Onur Ege Yakar

Artifact Comparator User Manual

1. Register & Login

Fill required areas to register and login.

Choose the role that best describes how you'll use the platform at register stage:

- **Participant** - Join research studies, complete qualification quizzes, and evaluate artifacts at your own pace
- **Researcher** - Create studies, upload artifacts, design evaluation tasks, and manage participant assessments and monitor participant progress and answers
- **Reviewer** - Review study proposals by invitation, analyze results, and ensure research quality standards

The screenshot displays a 'Create Account' registration form on a dark-themed background. The form is titled 'Create Account' in blue, with the subtitle 'Join us and start your journey' below it. It features several input fields: 'First Name' (placeholder: 'Enter your first name'), 'Last Name' (placeholder: 'Enter your last name'), 'Username' (placeholder: 'Enter a username'), 'Email' (placeholder: 'sample@email.com'), and 'Password' (placeholder: 'Enter a strong password'). Under the 'Role' section, there are three radio button options: 'Reviewer', 'Researcher', and 'Participant'. The 'Participant' option is selected, indicated by a blue circle. A large blue 'Register' button is positioned below the role selection. At the bottom of the form, there is a link that says 'Already have an account? Login'. A small blue bell icon is located in the bottom right corner of the form area.

2. Researcher Activity

Here is the main menu of the researcher.

Overview

This is your central hub for managing research projects, creating studies, and collaborating with participants.

Information Button (i)

Access the platform's information page to review role descriptions and workflows.

My Artifacts

Upload and manage your research artifacts in organized folders. Store documents, images, codes and other materials needed for your studies.

My Profile

View and update your personal information, account settings, and password.

My Invitations

View and respond to collaboration invitations from other researchers who want you to join their studies as a co-researcher.

Notifications (🔔)

Stay informed about participant applications, study updates, and collaboration requests.

Quick Action Buttons

Create New Study

Start a new research project

My Studies

View and manage all your existing research studies.

Your Recent Studies

Displays your three most recently updated studies for quick access. Each study card shows the title, status, visibility, and last updated date.

2.1 Create New Study

Overview

The Create New Study page is where researchers design and launch new research projects. You can choose from predefined study templates or create a fully custom study tailored to your specific research needs.

Study Title (Required)

Enter a descriptive title for your research study. This title will be visible to participants when browsing available studies.

Study Description (Required)

Provide a detailed description of your study's purpose and objectives. This helps participants understand what they'll be doing and why the research matters.

Study Type Selection (Required)

Choose the template that best fits your research goals. Each study type has a predefined structure and evaluation workflow:

Bug Categorization

Participants categorize software bugs into predefined categories. Ideal for software quality research and bug taxonomy studies.

Code Clone Detection

Participants identify similar or duplicated source code segments. Perfect for code quality and refactoring research.

Snapshot Testing

Participants compare screenshots and detect unexpected visual changes. Suited for UI/UX research and regression testing studies.

SOLID Principle Detection

Participants detect violations of SOLID design principles in code. Designed for software architecture and design pattern research.

Custom Study

Create a fully customizable study with your own evaluation criteria and workflow. Choose this option for unique research requirements not covered by standard templates.

After Creation

- **Standard Templates:** Study is created and you're redirected to the dashboard with a success message
- **Custom Study:** You're taken to the template designer to define your custom evaluation workflow

Next Steps: After creating a study, you'll need to upload artifacts, design evaluation tasks, and create a qualification quiz before publishing to participants.

2.2 Define Study Template (For Custom Studies)

Define Study Template

Sample Study 1Custom StudyCancel

Artifacts Per Task

Define how many artifacts each evaluation task will contain.

Number of Artifacts Per Task *

1

Evaluation Criteria

Manage how participants' answers will be evaluated for this study.

New Criterion

No criteria yet. Click "New Criterion" to create one.

Image Highlight

Overview

This page appears when you select "Custom Study" during study creation. Here you define how many artifacts each task contains and create custom evaluation criteria that participants will use to assess your research materials.

Artifacts Per Task Section

Number of Artifacts Per Task (Required)

Set how many artifacts participants will evaluate in each task (minimum 1). For example, if set to 3, each evaluation task will present 3 different artifacts to compare.

Evaluation Criteria Section

New Criterion Button

Click to open the criterion creation modal and add new evaluation questions.

Criteria List

View all created criteria in an expandable accordion format:

- Click any criterion to expand and view details
- Each card displays the criterion type badge, question text, and priority order
- Expanded view shows full description and type-specific settings
- Delete unwanted criteria using the delete button

Creating Evaluation Criteria

When you click "New Criterion," a modal opens with two sections:

Question (Required)

The evaluation question participants will answer (e.g., "How severe is this bug?")

Description (Optional)

Additional context or instructions for participants

Priority (Required)

Display order for the criterion (lower numbers appear first)

Criterion Types

Multiple Choice

Participants select from predefined options

- Number of Options: 1-10 options allowed
- Option Text: Fill in each option value
- Multiple Selection: Allow selecting multiple options

Rating

Participants rate on a numeric scale

- Start Value: Minimum rating (e.g., 1)

- End Value: Maximum rating (e.g., 5)

Open-Ended

Participants provide text responses

- Min Length: Minimum character count (optional)
- Max Length: Maximum character count (optional)

Numeric

Participants enter numeric values

- Integer Only: Restrict to whole numbers only
- Min Value: Minimum allowed number (optional)
- Max Value: Maximum allowed number (optional)

Code Edit

Participants directly edit code artifacts

- No additional settings required

Image Highlight

Participants annotate images by highlighting areas

- Max Annotations: Maximum number of highlights allowed

After adding all criteria, click the "Create Study" button at the bottom. This will:

1. Create your custom study
2. Save the artifact count setting
3. Add all evaluation criteria to the study
4. Redirect you to the dashboard

Requirements:

- At least 1 artifact per task
- At least 1 evaluation criterion

Next Steps: After creating your custom study, upload artifacts and create a qualification quiz before publishing to participants.

2.3 Upload Artifacts

Overview

The My Artifacts page is your central repository for managing all research materials. Upload files, organize them into folders, search by name or tag, and preview content before adding them to studies.

Upload, Delete and Tag Artifacts

Opens the artifact management page where you can:

- Upload new files
- Delete existing artifacts
- Add or modify tags for organization

Create Folder

Create a new folder in the current location to organize your artifacts hierarchically.

Select All / Deselect All

Quickly select or deselect all visible artifacts for bulk operations.

Move Selected

Move selected artifacts to a different folder (only appears when artifacts are selected).

Search Bar

Find artifacts by typing filename or tag keywords. Results update in real-time as you type.

File Type Filter

Filter artifacts by file extension (JavaScript, Java, Python, PDF, images, etc.). Select "All File Types" to view everything.

Folders Section

Displays subfolders within your current location:

- Click any folder to navigate into it
- Folder cards display the folder name and an arrow icon
- Hover effect highlights folders in orange

Artifacts Grid

Each artifact card displays:

- Filename - Name of the artifact file
- Preview Button - Click to preview the file content
- Category Badge - Classification assigned to the artifact
- Tag Badge - Custom tags for easy searching

Selecting Artifacts

- Click any artifact card to select it (highlighted in purple with a glow effect)
- Selected artifacts show a purple border and shadow
- Click again to deselect

Moving Artifacts

1. Select one or more artifacts
2. Click "Move Selected" button
3. Choose destination folder from the tree view
4. Click "Move" to confirm

Preview Modal

Click the preview button to view artifact content:

- Images - Full image display
- PDFs - Embedded PDF viewer
- Code Files - Syntax-highlighted code (Java, Python, JavaScript, etc.)
- Text Files - Plain text preview
- Click "Close" to exit preview

Creating Folders

1. Click "Create Folder"
2. Enter folder name
3. Press Enter or click "Create"

4. New folder appears in current location

Moving Between Folders

The folder tree in the Move modal shows:

- Expandable/collapsible structure (►/▼ arrows)
- Nested folders with indentation
- Selected folder highlighted in purple

Supported File Types

- **Code:** JS, TS, Java, Python, C, C++, HTML, CSS
- **Documents:** JSON, Markdown, TXT, YAML, PDF
- **Images:** PNG, JPG, JPEG

Each file type has a unique emoji identifier for quick recognition.

Next Steps: Upload artifacts, organize them into folders, then add them to your studies from the study management pages.

2.4 Manage Evaluation Tasks

Overview

The Manage Evaluation Tasks page displays all evaluation tasks for a specific study. Search, filter, and sort tasks, then access detailed management options for each task including reports and comments.

Search Bar

Search tasks by question text. Results update in real-time as you type.

Filters Panel

Click "▼ Show Filters" to expand the filter options. Click again to collapse.

Task Mode Filter

Filter tasks by the number of artifacts they contain:

- All modes: Show all tasks
- Single: Tasks with 1 artifact
- Side-by-Side: Tasks with 2 artifacts
- 3-Way: Tasks with 3 artifacts
- 4-Way+: Tasks with 4 or more artifacts

Sort Options

- Task ID ↑: Sort by task ID in ascending order
- A → Z: Alphabetical by question text
- Completion ↓: Highest completion percentage first
- Completion ↑: Lowest completion percentage first
- Artifact count: Sort by number of artifacts

Task Cards

Each task displays in a card format with the following information:

Task Header

- Task ID and Question: "#12 - Categorize the given bug report"
- Shows the evaluation question participants will answer

Task Description

Quick summary: "Evaluates 3 artifact(s) across 5 criteria"

Progress Bar

Visual progress indicator showing completion percentage with label (e.g., "67% completed")

Top Footer Row

- Artifacts: Number of artifacts in the task
- Participants: Completed participants vs. total (e.g., "12/18")

- Manage Task: Opens detailed task management page

Bottom Footer Row

- Reports: Number of participant reports filed (red text if reports exist)
- View Reports: Access all participant reports for this task
- Manage Comments: Review and moderate participant comments

Next Steps: Click "⚙️ Manage Task" to edit task details, or use "+ Add Task" to create additional evaluation tasks for your study.

2.4.1 Add Evaluation Task

Task Question

Enter the evaluation question...

Task Description

Describe what the participant should evaluate...

Number of Artifacts

1 artifacts

Select Artifacts

0 / 1 selected

You are selecting the first artifact...

Root

Search artifacts...

All Types (1)

PersonelService.java

Code

original.java

Correct Answers Per Criterion

For each evaluation criterion, provide the expected correct answer. Participant responses will be compared against these values. You may leave any of them empty.

Is this code efficient ?

RATING

Rate efficiency from 1 to 5

1 2 3 4 5

✓ Create Task

Overview

The Add Task page allows researchers to create evaluation tasks for their studies. Select artifacts, define task questions, and provide correct answers for each evaluation criterion.

Task Question (Required)

Enter the main question participants will answer. For preset study types (Bug Categorization, Code Clone, etc.), this field is auto-generated and locked.

Task Description (Required)

Provide detailed instructions explaining what participants should evaluate. Auto-generated for preset study types.

Number of Artifacts (Read-only)

Displays how many artifacts each task requires, determined by the study's artifact count setting.

Locked Field Tooltips: Hover over locked fields in preset studies to see why they cannot be edited.

Selection Counter

Shows progress: "2 / 3 selected" and guides you: "You are selecting the second artifact..."

Breadcrumb Navigation

Navigate through folders using the breadcrumb trail: Root › Folder Name › Subfolder

Search and Filter

- Search Bar: Find artifacts by filename
- Type Filter: Filter by file extension with artifact counts for each type

File Type Restrictions: Some study types only allow specific file formats:

- Bug Categorization & SOLID Detection: JSON only
- Code Clone: Code files (Java, Python, C++, JavaScript, etc.)
- Snapshot Testing: Images only (PNG, JPG)
- Custom: All file types allowed

Preview Modal

Click the preview button to view:

- Images: Full image display
- PDFs: Embedded viewer
- Code Files: Syntax-highlighted code
- Text Files: Plain text content

Click "Close" to exit the preview.

Correct Answers Section

For each evaluation criterion defined in your study, provide the expected correct answer. Participant responses will be compared against these values.

Note: All answers are optional and can be left empty if you don't want to define expected values.

Next Steps: After creating tasks, manage them from the Manage Tasks page, then create a qualification quiz before publishing your study.

2.4.2 Bulk Upload (Alternative Task Creation In One Upload)

Overview

The Bulk Upload page allows researchers to create multiple evaluation tasks simultaneously by uploading a ZIP file containing artifacts and a CSV file defining task details. This is more efficient than creating tasks individually when working with large datasets.

CSV Format Guide Section

Study Requirements Summary

Displays key information about your study:

- Number of artifacts required per task
- Number of different evaluation criterias
- Each CSV row creates one evaluation task

Small Table Preview

Shows a condensed view of the required CSV columns with example values. Click "Preview Full Table" to see an expanded version with multiple sample rows.

Upload Section

ZIP File

Upload a ZIP archive containing all artifact files referenced in your CSV. The system will extract and organize these files automatically.

CSV File

Upload a CSV file defining your tasks. Each row creates one task with:

- Artifact filename references
- Task question and description
- Correct answers for each criterion (it can be null according to researcher choice)

Start Upload Button

Initiates the bulk upload process. Shows "Uploading..." during processing. The system creates a dedicated folder for the uploaded tasks.

CSV Help Modal

Opens when clicking "💡 CSV Help". Contains three sections:

1. Base Columns

Required columns for every task:

- `artifact_1_filename` through `artifact_N_filename` (based on study requirements)
- `question` - Task question text
- `description` - Task description

2. Criteria Answer Columns

Each evaluation criterion requires a column formatted as:

`criterion_{priority}_{TYPE}_answer`

For each criterion, displays:

- Type Badge: Visual indicator (Multiple Choice, Rating, Open-Ended, etc.)
- Column Name: Exact column header to use
- Question: The criterion's evaluation question
- Example Value: Sample correct answer format
- Explanation: Type-specific formatting rules

Criterion-Specific Examples:

- Multiple Choice (single): "A"
- Multiple Choice (multiple): "A,B"
- Rating: "3" (within defined range)
- Numeric: "42" or "3.14"
- Open-Ended/Code Edit: "Explanation text"
- Image Highlight:

```
""shapes": [{ "shape": "RECT", "x": 0.374, "y": 0.482, "w": 0.184, "h": 0.274 } ] "
```

(JSON format)

3. Quotes & Commas

CSV formatting rules:

- All answers must be quoted: "value"
- Answers with commas require quotes: "A,B"
- Empty answers: ""
- Artifact filenames: no quotes needed

Preview Table Modal

Opens when clicking "Preview Full Table". Shows:

- Complete table with all required columns
- Three sample rows demonstrating proper formatting
- Scrollable view for wide tables with many criteria
- Artifact filename columns without quotes
- All other columns with quoted example values

Success & Error Messages

Success: Displays "✅ [N] tasks created in folder '[Folder Name]!' and redirects to Manage Tasks page.

Error: Shows specific error message if upload fails (invalid CSV format, missing files, etc.).

File Processing

After clicking "Start Upload":

1. System validates ZIP and CSV formats
2. Extracts artifacts from ZIP
3. Parse CSV rows
4. Creates tasks with specified artifacts and correct answers
5. Organizes artifacts in a dedicated folder
6. Redirects to Manage Tasks upon completion

Tips: Use spreadsheet software (Excel, Google Sheets) to create your CSV, then export as .csv format. This ensures proper comma and quote formatting automatically.

2.4.3 View Reports (Manage Task Page)

Overview

The Reports page allows researchers to see all reports for an individual task. Reported comments and reported artifacts can be seen in this page.

2.4.4 Manage Comments

Overview

The Comments page allows researchers to see all comments in an individual task. Researchers can filter comments by artifact or participant. Researchers can also pin or delete individual comments and can track deleted comments for audit log in below.

2.4.5 Researcher Action Log

Overview

Researchers can see its actions in the comments.

2.5 Manage Study

The screenshot displays the 'Manage Study' interface. At the top, there's a header with 'Manage Study' and a 'Main Researcher' button. On the right, there are three buttons: 'Invite User', 'Manage People', and 'Back to My Studies'. The main content area is divided into several sections. On the left, the 'Sample Study 1' card shows 'DRAFT' and 'PRIVATE' status badges, a description 'custom sample study', 'Participants: 0', and 'Created: 14.12.2025'. Below this is an 'Edit Study Details' button. To the right, the 'Study Quiz' section indicates 'No quiz assigned' with fields for 'Questions: 0' and 'Last Updated:'. A 'Manage Quiz' button is present. Below these are three cards: 'Status' with a 'Draft' dropdown, 'Visibility' with a 'Private' dropdown, and 'End Date' showing 'Jan 14, 2026, 08:37 PM' with an 'Edit' button. A large green 'Save All Changes' button spans the width. At the bottom, a 'Danger Zone' section contains a warning message and a 'Delete This Study' button. A notification bell icon is in the bottom right corner.

Overview

The Manage Study page is the central dashboard for configuring and managing all aspects of a specific study. Edit study details, manage permissions, configure status and visibility, and access related management functions.

Study Details Card (Left Column)

Header Section

- Study Title: Editable when in edit mode
- Status Badge: Current study status with color coding
- Visibility Badge: Public or Private indicator

Description Section

Displays or edits the study description with rich text support.

Study Info

- Participants: Number of enrolled participants
- Created: Study creation date

Edit Button

Click " Edit Study Details" to enable editing mode (visible when you have edit permissions).

Study Quiz Card (Right Column)

Displays assigned qualification quiz information:

- Quiz Icon:  visual indicator
- Quiz Title: Name of the assigned quiz or "No quiz assigned"
- Questions Count: Number of quiz questions
- Last Updated: Last modification date
-  Manage Quiz: Opens quiz management page (owner only)

Status Control Section (Three Columns)

1. Status

Dropdown menu for changing study lifecycle status (owner only):

-  Draft: Initial planning phase
-  Active: Study is running and accepting responses
-  Completed: Study finished, no new responses
-  Archived: Study permanently archived

2. Visibility

Dropdown menu for access control (owner only):

-  Public: Discoverable by all users
-  Private: Invitation-only access

Visual Indicators

- Active State: Red border and glow when deletion is allowed
- Disabled State: Greyed out with reduced opacity

Deletion Rules

Study can only be deleted if status is:

- DRAFT
- COMPLETED
- ARCHIVED

Warning: Deletion permanently removes all tasks, artifacts, participants, quiz data, and responses.

Delete Process

1. Click "Delete This Study" button
2. Confirmation modal appears

3. Review warning message
4. Click "Yes, Delete Study" to confirm
5. Redirected to My Studies after successful deletion

Invite User

Opens when clicking "+ Invite User" button.

Fields

- Username: Enter the exact username to invite
- Role Dropdown: Select invitation role:
 - Participant: Standard study participant
 - Co-Researcher: Collaborator with custom permissions (owner only)
 - Reviewer: Results reviewer (owner only)

Co-Researcher Permissions (When role = Researcher)

Three permission checkboxes appear:

-  Upload Artifacts: Allow uploading study artifacts
-  Edit Details: Allow editing study information
-  Invite Participants: Allow inviting participants

Actions

- Cancel: Close modal without inviting
- Send Invite: Process invitation (shows "Sending..." during request)

Permissions System

Your available actions depend on your role:

Main Researcher (Owner):

- Full access to all features
- Can delete study (with status restrictions)
- Can manage co-researchers
- Can change status and visibility

Co-Researcher:

- Access based on granted permissions
- Cannot delete study
- Cannot change study status

Tips: Save changes frequently when editing. Status changes affect participant access immediately. Co-researcher permissions can be customized per user for flexible collaboration.

2.6 Create Quiz for Participant Assessment

[← Change Mode](#) * AI Quiz Generation

Quiz Title *

e.g., Spring Boot Knowledge Quiz

e.g., Spring Boot, Java, React

Difficulty *

☐ Easy

☒ Medium

☐ Hard

Cancel

 Create Empty Quiz

Overview

The Create Quiz page offers two methods for generating qualification quizzes for your study. Choose between AI-powered automatic generation or manual creation with full control.

Initial Mode Selection

AI Generation Mode

Required Fields

1. Quiz Title (Required): Enter descriptive quiz name (e.g., "Spring Boot Knowledge Quiz").
2. Description (Optional): Provide brief quiz overview for context.
3. Topic (Required): Specify subject area (e.g., "Spring Boot, Java, React").
4. Number of Questions (Required, 1-20)
5. Difficulty (Required)
6. Question Type (Required)::
 - a. Multiple Choice
 - b. Open-Ended
 - c. Mixed (default)

Manual Creation Mode

Required Fields

1. Quiz Title (Required): Same as AI mode.
2. Description (Optional): Same as AI mode.
3. Topic (Required): Same as AI mode.
4. Difficulty (Required)

Validation Rules

Form Submission Requirements:

AI Mode:

- Title must be filled
- Topic must be filled
- Number of questions must be valid (1-20)

Manual Mode:

- Title must be filled
- Topic must be filled

The submit button is automatically disabled until all requirements are met.

Tips: Use AI generation for quick quiz creation based on topics. Choose manual creation when you need specific question formats or want to add questions gradually. In addition, you can modify, add / remove questions once AI generates the quiz.

2.7 Analyze Quiz Results - Accept / Reject Participants

Active Quiz

Python Quiz

mid python quiz

Topic: Python

Difficulty: MEDIUM

Questions: 5

Total Points: 16

Question Types

Multiple Choice 3

Open Ended 2

Edit Quiz

Participants

Username	Name	Last Name	Quiz Points	Submission Date	Actions
sampleParticipant	m	d	3/16	14.12.2025	
Total participants: 1					Accept AllReject All

Overview

The Quiz Management page is your control center for managing qualification quizzes and reviewing participant submissions. View quiz details, evaluate participant performance, and decide who qualifies for your study.

Quiz Actions

- Edit Quiz: Modify questions, answers, or settings
- Delete: Remove the quiz permanently (only available when no participants have taken it)

Participants Table

Displays all participants who have submitted the quiz.

Use Cases

Evaluating Qualifications

1. Review participant scores in the table
2. Click "View" to examine individual answers
3. Accept those who meet your criteria
4. Reject those who don't qualify

Quick Processing

For straightforward qualification criteria:

- Sort by points to see highest performers
- Accept top scorers quickly
- Use bulk actions for clear pass/fail scenarios

Quiz Refinement

After reviewing results:

- Click "Edit Quiz" to adjust questions
- Delete and recreate if major changes needed (only before submissions)
- View statistics to identify problematic questions

Managing Applications

- Monitor submission dates to track application flow
- Accept participants in batches as they submit
- Maintain control over study enrollment

Important Notes

Quiz Deletion

- You can only delete a quiz if zero participants have taken it
- Once submissions exist, edit instead of deleting
- This prevents loss of participant data

Final Decisions

- Accept/reject actions are permanent
- Participants see their acceptance status
- Rejected participants cannot reapply

Statistics Access

- Purple "Statistics" button provides deeper insights
- View question difficulty, answer patterns, and pass rates
- Helps improve future quiz design

Next: Monitor accepted participants' evaluation task progress.

2.8 Monitor Study Progress

Overview

The Monitor Study Progress page provides real-time analytics and completion tracking for your study . View overall progress, task-specific completion rates, and criterion-level answer distributions through interactive visualizations.

Study Overview Card

Header Section

Displays high-level study information:

- Study Title and description
- Total Participants: Number of enrolled participants

- Total Tasks: Number of evaluation tasks in the study

Overall Progress Bar

Visual progress indicator showing:

- Completion Percentage: Average completion across all tasks
- Deadline Countdown: Days remaining until study end date

Task Cards

Each task displays in a card format with detailed analytics.

Task Header

- Task ID and Question: "#12 – Categorize the given bug report"
- See Details Button: Opens detailed task-specific analytics page (top-right corner)

Task Progress Bar

Shows completion status:

- Percentage: Overall task completion rate
- Participant Count: "12/18" (completed/total)

Criterion-Level Analytics

For each evaluation criterion, displays two synchronized charts:

Bar Chart

Side-by-side comparison of answer categories:

- X-axis: "Answers"
- Y-axis: Participant count
- Four bars: Correct, Wrong, Pending, Unknown

Tooltips: Hover over bars to see precise values.

PDF Export

Availability

Only enabled when study status is "COMPLETED" or "ARCHIVED". For active studies, the button is dimmed and shows a tooltip explaining the restriction.

Export Process

Click "Export PDF" to:

1. Generate a comprehensive report including all charts and statistics
2. Automatically download as `study-[ID]-report.pdf`

Real-Time Updates

The page loads fresh data on mount. Refresh the page to see updated participant progress and answer distributions.

Empty States

- No Tasks: "No tasks found" when study has no evaluation tasks
- Error: Displays specific error message if data fetch fails

See Details Navigation

Click "See Details" on any task card to navigate to the detailed task monitoring page, which shows:

- Individual participant responses
- Answer-by-answer breakdown
- Time-based completion trends

Tips: Use the pie charts for quick visual assessment and bar charts for precise numerical comparison. Export PDF only after study completion for complete analytics documentation.

2.9 Monitor Task Progress Details

Overview

The Monitor Task Details page provides in-depth analytics for a specific evaluation task. View the question being evaluated, see how participants answered across different criteria, and audit individual responses with clear correctness indicators.

Question Display

The evaluation question appears prominently at the top in a highlighted card with a clean separator between the label and question text.

Criterion Analysis Cards

Each evaluation criterion gets its own analytics card showing how participants responded.

Card Header

- Criterion Name: The specific aspect being evaluated
- Correct Answer Badge: Displays the expected correct answer for reference

Answer Distribution Legend

Shows all answer options that participants chose, with each option's count. Blank/empty answers are indicated with a dash.

Visualization Pair

Pie Chart

- Donut-style chart showing proportional distribution of answers
- Hover over segments to see exact counts
- Color-coded to match the legend

Bar Chart

- Side-by-side comparison of answer frequency
- Easy to compare which answers were most popular
- Hover for detailed count information

Use Cases

Quick Assessment

Scan the charts to understand overall performance and common mistakes.

Individual Auditing

Review the participant table to verify specific user responses and identify who needs follow-up.

Pattern Recognition

Compare across criteria to see if certain aspects are consistently problematic.

Validation Review

Yellow badges indicate criteria where you haven't defined correct answers yet.

Data Flow

1. Question is displayed for context
2. Each criterion shows aggregate distribution of all answers
3. Participant table breaks down responses by individual user
4. Color coding provides instant visual feedback on correctness

Tips: Use this page to identify knowledge gaps in your participant pool, validate evaluation results, and spot patterns in incorrect answers that might indicate unclear questions.

3. Participant Activity

Here is the main page of participant

3.1 Take Quiz

Page start and loading

- When the quiz loads, wait until the loading indicator disappears.
- If an error appears, you can go back to the previous page or retry; if the problem persists, contact the study owner.
- If you already completed this quiz earlier, you may be redirected directly to the quiz result instead of seeing the questions again.

Quiz header and progress

- At the top, you see the quiz title, the related study name, and the total possible points.
- A progress bar shows how far you are in the quiz and which question number you are on (e.g. "Question 3 of 10").

Answering questions

- Each question shows its text and how many points it is worth.
- For multiple-choice questions:
 - All options are shown as selectable cards.
 - Click a card to select that option; clicking another option changes your answer.
- For open-ended questions:
 - There is a large text box where you type your answer.
 - You can edit your text as much as you want before submitting.

Navigating between questions

- Use "Previous" to go back to earlier questions.
- Use "Next" to move forward through the quiz.
- You can freely move between questions; answers you have given remain saved on the page while you stay here.

Question navigator (sidebar section)

- A list of small numbered boxes shows all questions.
- Clicking a number takes you directly to that question.
- Boxes change style when a question is answered so you can see which ones still need attention.
- A legend explains which style means "Answered" and which means "Unanswered".

Submitting the quiz

- On the last question, the "Next" button is replaced with "Submit Quiz".

- If you try to submit with unanswered questions, you see a confirmation pop-up telling you how many are unanswered; you can cancel and finish them or submit anyway.
- After you submit:
 - A confirmation screen appears saying your quiz was submitted and is being graded.
 - Wait for the researcher to accept you to the study.

3.2 See Active and Waiting Studies

Overview

See studies waiting for quiz approval and active studies participant is accepted.

3.3 Evaluation Tasks of Study

Overview

Participants can see tasks already answered and unanswered tasks to evaluate.

3.4 Evaluation Page

3.4.1 Code-Edit Evaluation

Overview

Participants can edit the given code according to the question.

3.4.1.1 Code-Edit Evaluation - Preview

Overview

Participants can see deleted rows and added row and can reset all changes.

3.4.2 Image-Highlight

Overview

Participants can highlight the regions on image and delete highlighted regions.

3.4.3 Other Evaluations

Overview

Participants can report inappropriate artifacts with their reasons and descriptions.

3.6 Comment and See Other Comments

Overview

Participants can leave comments below artifacts, edit their comments or delete, and also can reply to other participants. Comments can be liked by other participants or can be reported due to inappropriate content.

4. Reviewer Activity

4.1 Welcome Section

When you log into the Reviewer Dashboard, you'll see a personalized greeting based on the time of day (Good morning, Good afternoon, Good evening, or Good night) along with your username. This dashboard serves as your central hub for managing study invitations and monitoring your assigned studies.

4.2 Pending Invitations Section

This section shows all study invitations awaiting your response.

4.2.1 Invitation Card Display

Each invitation card shows:

- Study Title: Name of the study you've been invited to
- Role Information: Your assigned role (Reviewer)
- Invitation Date: When you received the invitation
- Status Badge: Shows "PENDING" in orange

4.2.2 Action Buttons

- Accept Invitation: Join the study and add it to your active studies
- Reject Invitation: Decline the invitation

4.2.3 Empty State

If you have no pending invitations, you'll see a message: "You have no pending invitations."

4.3 My Studies Section

View all studies you've joined as a reviewer.

4.3.1 Study Cards

Each study appears as an interactive card with the following information:

Card Header

- Study Title: Name of the study
- Status Badge: Color-coded study status
 - Published (Green): Study is active
 - In-Progress (Blue): Study is ongoing
 - Draft (Grey): Study is being prepared

Study Statistics

- Participants: Total number of enrolled participants

- Last Updated: Most recent modification date

Card Footer

- Click Hint: "Click for details →" prompts you to view full study information

4.3.2 Accessing Study Details

Click anywhere on a study card to open the detailed monitoring page for that study.

4.3.3 Empty State

If you haven't joined any studies yet, you'll see: "You haven't joined any studies yet."

4.4 Monitor Study Progress Page

The Monitor Study Progress page provides real-time analytics and completion tracking for your study.

4.4.1 Study Overview Card

4.4.1.1 Header Section

Displays study information:

- Study Title and description
- Total Participants: Number of enrolled participants
- Total Tasks: Number of evaluation tasks in the study

4.4.1.2 Overall Progress Bar

Visual progress indicator showing:

- Completion Percentage: Average completion across all tasks
- Deadline Countdown: Days remaining until study end date
 - Shows "Ends in X days"
 - Shows "Study ended" after deadline

4.4.1.3 Export PDF Button

Available only for completed or archived studies. Click to download a comprehensive PDF report of the study progress. (See PDF Example below)

Criterion Analysis Report

Task #7

Task Information

Task #7: Detect categories.

Criterion Details

- Question: Bug Category
- Description: Select all applicable bug categories
- Type: MULTIPLE_CHOICE
- Correct Answer: Network Issue,Database Issue,Permission Issue

Correctness Distribution

Summary

- Correct answers: 0
- Wrong answers: 2
- Unknown: 0
- Pending (no submission): 0
- Total analyzed submissions: 2
- Researcher key: Network Issue,Database Issue,Permission Issue

4.4.2 Task Cards

Each task displays in a card format with detailed analytics.

4.4.2.1 Task Header

- Task ID and Question: "#12 – Categorize the given bug report"
- See Details Button: Opens detailed task-specific analytics page (top-right corner)

4.4.2.2 Task Progress Bar

Shows completion status:

- Percentage: Overall task completion rate
- Participant Count: i.e. "12/18" (completed/total)

4.4.2.3 Criterion-Level Analytics

For each evaluation criterion, displays two synchronized charts:

Pie Chart

Visual distribution showing:

- Correct (Blue): Participants who answered correctly
- Wrong (Green): Participants who answered incorrectly
- Pending (Grey): Participants who haven't completed the task
- Unknown (Yellow): Answers that couldn't be automatically validated
- Interactive Legend: Hover over segments to see exact counts

Bar Chart

Side-by-side comparison of answer categories:

- X-axis: "Answers"
- Y-axis: Participant count
- Four bars: Correct, Wrong, Pending, Unknown
- Tooltips: Hover over bars to see precise values

4.5 Monitor Task Details Page

View detailed analytics for a specific task.

4.5.1 Question Card

Displays the task question in a highlighted section at the top of the page.

4.5.2 Criterion Result Cards

Each evaluation criterion appears in a separate card.

4.5.2.1 Criterion Header

- Criterion Label: Name of the evaluation criterion
- Correct Answer Badge: Shows the correct answer for non-code criteria
- Show/Hide Correct Answer Button: For code-editing criteria, toggle to view the correct code solution

4.5.2.2 Color-Coded Legend

Displays all answer options with color indicators and participant counts.

4.5.2.3 Analytics Charts

- Pie Chart: Distribution of participant answers
- Bar Chart: Comparative view of answer frequencies

4.5.3 Participant Answers Table

A comprehensive grid showing individual participant responses.

4.5.3.1 Table Structure

- First Column: Participant usernames
- Subsequent Columns: One column per evaluation criterion

4.5.3.2 Answer Status Indicators

Each cell displays:

- Correct (Green): Answer matches the correct solution
- Wrong (Red): Answer does not match
- Unknown (Yellow): Cannot be automatically validated
- Answer Text: The participant's actual response

4.5.3.3 Code Comparison (for code-editing criteria)

- Participant Answer: View the participant's submitted code
- View Diff Button: Toggle to see a side-by-side comparison
- Diff Display: Added lines (green), removed lines (red), and unchanged lines
